

CMBEBiH2015: Ika Ferrer Gotic will lead the first regional Conference on Medical and Biological Engineering

In less than a month in the capital of Bosnia and Herzegovina will be held the first regional Conference on Medical and Biological Engineering, supported by the International Federation for Medical and Biological Engineering (IFMBE), the European Alliance for Medical and Biological Engineering (EAMBES), Academy of Sciences and Arts of Bosnia and Herzegovina, University of Sarajevo, University of Tuzla, University of Bihać, and many other educational institutions and associations.

Ika Ferrer Gotic is the editor in chief and head of “*BH Business and Economy*” in regional television-*NI* which is an exclusive partner of worldwide network CNN for the Balkans. In her portfolio are already included several major international and national economic conferences, which were successfully completed. As economic analyst, estimated the importance of this science, which is, as she says, crucial for improving the quality of health and human’s life, of which particularly depends economic planning of the country.

"Ika joined us even in 2013 when it was only a word or two about establishment of the Bosnia and Herzegovina Medical and Biological Engineering Society. We have worked together to raise awareness about the importance of this science that will bring us closer to modern medicine and facilitate the journey to the Europe. We are honored that Ika will accompany us through this historical moment for Bosnia and Herzegovina!" - said **Almir Badnjević**, executive director of the Bosnia and Herzegovina Medical and Biological Engineering Society (DMBIUBIH), who will also be the first and only PhD in the field biomedical engineering in BiH.

The conference will be held from 13 to 15 March 2015 in Sarajevo, and aim is to permeate this area in all spheres of scientific and academic, medical life.

As Lecturer at the Conference, is announced the arrival of the President of the International Federation for Medical and Biological Engineering, **Magjarević Ratko** and other global and local experts from the fields of medicine, engineering, telemedicine, and representatives of government departments, ministries, private sector and other distinguished guests. The Conference will also be a perfect opportunity for formal accession of our country to the International Federation for Medical and Biological Engineering.

The official language of Conference will be English.

All information about CMBEBiH can be found on the official website of the Conference, and additional information is available on the Facebook page.
